

▣ BASIC KIT

ART.: 1692969

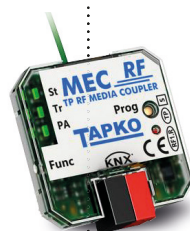

PRODUCTS CONTAINED IN SET

The BASICKIT of the KNX RF-S education set is optimal for dealing with the KNX RF-S radio standard functions. The products contained fit perfectly with each other and enable a smooth start to education and training.

The BASICKIT is designed for use in training centers. It also provides the experienced user a preferable introduction to the KNX RF-S handling.

For certified training centers we provide the set on separate terms. Please contact us directly.

▣ EXTENSION KIT

ART.: 1692970

PRODUCTS CONTAINED IN SET

With the EXTENSIONKIT of the KNX RF-S education set additional functions can be trained and learned.

The KNX RF Interface enables communication with KNX RF devices and thus, enables wireless programming via KNX RF media couplers. With the KNX RF radio-controlled socket, wireless switching functions can be performed without danger of touching live parts.
