TAPKO
TECHNOLOGIES GMBH

KNX®

Owners and CEOs:
Dipl. Ing. Klaus Adler and Dipl. Ing. Petar Tomic

TAPKO Technologies GmbH was founded in October 1999 by Klaus Adler and Petar Tomić. Both managing directors, Dipl.-Ing. (FH) Klaus Adler and Dipl.-Ing. Petar Tomić brought 10 years of experience with them as driving forces of the KNX scene.

The company's headquarters are located in Regensburg, a city in the south of Germany. Tapko is a full-fledged KNX member and certified according to ISO 9001.

Through its innovative capacity and collaboration with partners, TAPKO has developed from being a German KNX specialist to a European and international brand producer.
Benefiting from the cooperation with our trusted partner companies, TAPKO is able to offer one-stop solution for projects from all initial stages of product development up to the end production for KNX components.

Our portfolio is comprised of our complete range of services for product concept, product development and production. Following customer requests, TAPKO is able to contribute all necessary components and services for this.
Of course, TAPKO Technologies GmbH also offer its own devices that can be purchased as an OEM product.

OEM

ORIGINAL EQUIPMENT MANUFACTURER

We have been developing and producing KNX OEM products in the field of building automation for decades and belong to the experienced German developers and manufacturers in the field of KNX products.

Our international KNX business connections show that KNX OEM devices from TAPKO enjoy high appreciation and recognition from customers. A high quality standard gives you the marketability of OEM devices. For more than 20 years, we have been giving our performance promise to major brand manufacturers - you too can benefit from it.

Start successfully with our OEM devices

With TAPKO OEM, the KNX developments are tangible and can be used quickly. Processes and processes of development and production are focused on one goal: The functional KNX device for your own sales. For the OEM products, the entire process is optimized, and of course for the best price / performance ratio. Talk to our sales about it.

Overview of the advantages of OEM devices

- Quickly available KNX product or rather ready for use in trade and distribution
- Case available in different colours
- Device labeling on customer request
- Instruction leaflet can be printed and enclosed
- Packing and other services as required
- Device can be adapted or configured
- ETS database entries exist and can be individualized on customer request
- Serial numbers and keys can be assigned within the customer's specified number range
- No own certification necessary
- Complete service for OEM devices as ready goods-in-store
- Complete service provider from A to Z

OEM

Finished product with desired scope

The adjustments according to your wishes saves you time, lets your OEM product appear independently in the market and assures you high product quality. As you wish, case color, software, ETS databases and languages can be customized. You receive from us neutral products or products with your logo (labeling / packaging).

As an additional service, we offer the creation of databases and KNX registration. Optionally, the product can also be delivered complete with packaging and installation / operating instructions. For devices with web frontend, you can get a customized WEB frontend.

Many well-known companies are already selling our products.

The steps to your OEM device

01 KNX Member

Are you already a member of the worldwide KNX Association? If you become a manufacturer member, you will receive a manufacturer ID - it's easy!

02 KNX Certified

TAPKO OEM products are already KNX certified - that saves time!

03 Housing & Colour

We advise using the tried and tested housing standards. If you wish, you can choose a colour that matches your brand.

04 Product & Label

You choose a ready developed TAPKO product and can apply your own label to it. The product labels can be delivered to us or made according to your design.

05 Technical Description

Descriptions, documentation, etc. can be obtained from us or, of course, developed yourself to suit your brand.

06 Packaging

Pack yourself or let us pack your product! We can apply stickers, etc. for you. If you wish, you can receive goods ready for storage at the location of your choice.

07 Marketing & Sales

You have a quickly marketable product with little effort. You can now serve your customers and the distribution network. Much success!
